* The ranking for each domain demonstrates how your cumulative performance across all of the weighted measures included in that domain compares against the nation as a whole. The HomeCare Elite represents the top 25% of agencies nationally. Note, there is no "magic number" for performance in each of the domains that ensures placement on the list, because each domain has its own weighting and because all are included in the final calculation. This may give you a sense of where to focus attention. Given that Quality of Care is most heavily weighted, if you aren't at the 75th percentile or higher in Quality, it is a good place to start.

** Vaccine measures are not included in HomeCare Elite calculations.
