MINNEAPOLIS and HAUPPAUGE, NY – June 26, 2017 – [ABILITY® Network](#), a leading information technology company, and Cantata Health, LLC, a leading healthcare software and services provider for the long-term care market, announced today a partnership where ABILITY will act as Cantata Health's preferred vendor to help customers better manage the multiple payer complexities of revenue cycle management.

Through this partnership, Cantata Health will fully integrate ABILITY's next-generation, cloud-based, SaaS revenue cycle management (RCM) platform, ABILITY | EASE® All-Payer, into its NetSolutions Financials platform. Customers who use NetSolutions will now be able to efficiently and seamlessly create, access, and manage all claims across all payers in areas of patient access, health information management and receivables management.

"Long-term care providers continue to be challenged with the complexities of multiple payers and the myriad requirements of a changing healthcare market," said Jonathan Isaacs, chief revenue officer at Cantata Health. "ABILITY Network brings unique and deep expertise that complements our NetSolutions Financials application, and enables us to provide customers with a single point of access to better manage and optimize critical revenue operations."

"Increasingly providers are looking to simplify complexity, both in managing claims and in managing their own internal processes," said Bud Meadows, executive vice president and chief revenue officer at ABILITY. "By bringing together Cantata Health and ABILITY's core strengths in the long-term care market, we can help our customers improve financial performance and simplify complexity."

ABILITY provides applications and analytics that are integral in helping with revenue cycle management, clinical management and performance improvement via a powerful, integrated cloud-based, SaaS platform.

Cantata Health provides a proven health information technology ecosystem of advanced Revenue Cycle Management, Electronic Medical Record, Financial and Interoperability solutions that precisely scale with the way providers work, improving without intruding.
