MINNEAPOLIS, Minn. – Nov. 17, 2014 – ABILITY Network, a leading healthcare technology company, announced today that the previously announced acquisition of MD On-Line, Inc., has been completed. The transaction closed on Nov. 12.

The acquisition creates the most reliable and secure web-based network across the continuum of care, bringing an unparalleled opportunity for ABILITY to accelerate the development and delivery of innovative services across its platform.

Since 2000, ABILITY Network has been an industry leader providing groundbreaking web-based technology to acute and post-acute providers, including simplified connectivity to Medicare and innovative workflow management tools. For nearly twenty years, the Parsippany, NJ-based company MD On-Line has supported healthcare ambulatory providers, payers, and other business partners with connectivity, workflow, and analytic services.

With this acquisition, ABILITY will now serve care providers across the continuum—in ambulatory, acute, and post-acute settings—and connect them with an expansive payer network.
