**MINNEAPOLIS, Minn.** – May 11, 2015 – ABILITY Network, a leading healthcare technology company, announced today that more than 100,000 individuals in hospitals, clinics, skilled nursing facilities, home healthcare, and hospice agencies across the United States are now taking advantage of the myABILITY platform to increase their productivity.

A SaaS (software as a service) platform, myABILITY delivers on-demand access to transitions of care tools, Medicare connectivity, revenue cycle management systems, and all-payer claims and eligibility services.

The platform features a user-friendly interface with a single sign-on login and ID. With only one screen to access, myABILITY delivers significant time-savings for financial, patient access, scheduling and administrative healthcare staff.

**“The myABILITY platform is just so user-friendly,”** said Randall Hale, Business Manager, Horizon Home Health Services of Farmington, NM. **“It’s intuitive, quick, easy to learn – and everything just runs seamlessly.”**

**“Less than two years ago, we introduced the new myABILITY platform and we now have over 100,000 users leveraging this SaaS technology to simplify access to data through our workflow applications,”** said Bud Meadows, Executive Vice President at ABILITY. **“Complementing our other technology platforms, myABILITY has taken us to the lead in helping change healthcare.”**
